Projects

Juet Quizzzy

Web Application

- Developed a web application for JUET allowing students to perform quizzes using university credentials.
- Used HTML5, CSS, JavaScript, Node.js, Express, and MongoDB.

University Website

Clone Website

- Created a clone website for JUET using the same stack as Juet Quizzzy.
- Integrated university credential-based authentication.

Personal Portfolio

Personal Project

- Portfolio website for showcasing skills, networking, and opportunities.
- Built with HTML5, CSS3 and JavaScript.
